

Application Server

Minimum:

1 GHZ 32 or 64 bit Processor / 1 Gigabyte (GB) of RAM memory
Minimum of 150 MB of available hard disk space

Recommended:

2 GHZ 32 or 64 bit Processor / 2 Gigabyte (GB) or more of RAM memory
Minimum of 300 MB of available hard disk space

Note: 10,000+RPM hard drives are suggested to increase performance

Software Requirements

Recommended:

Windows Server 2003 / 2008 (Web Edition not recommend if also being used as database server)

Microsoft Internet Information Server

Note: Application Server can NOT reside on a Windows Domain Controller Server.
LDAP integration (optional Add-on) requires Active Directory / Windows NT Authentication

Database Server

Minimum:

1 GHZ 32 or 64 bit Processor / 1 Gigabyte (GB) of RAM memory
200 MB of available hard disk space

Recommended:

2 GHZ 32 or 64 bit Processor / 2 Gigabyte (GB) or more of RAM memory
600 MB of available hard disk space

Note: RAID that includes Mirroring Drives is recommend for all database operations

Software Requirements

Minimum:

Windows Server 2003
Microsoft SQL Server 2000 Desktop Edition (Free)
- (Limited to 5 worker-threads - not recommended for more than 5 concurrent users)

Recommended:

Windows Server 2003 / 2008 (Not Web Edition)
Microsoft SQL Server 2000 / 2005 / 2008 per processor license(s)

Additional Information

Note: Both database and web server can be on a single server; although increased performance will be gained if run on separate servers.
